In addition, Barberians is always up-to-date regarding new trends in the world of grooming, providing tips, guides and advice on everything from skin care to shaving.

Much more than modern shaving

The story of Barberians goes back to the days when men were men and Vikings were barbarians. Hair and beard were left untamed in this era characterized as raw and barbaric. Barberians takes you back to the roots, only in a more fashionable version. It is time to tame the barbarian.

In recent years, barbershops have seen a renaissance across the world and also in the streets of Copenhagen, the characteristic barbershops can be found. Barberians sets out to explore the history of Copenhagen and highlight old traditions, classic design and product quality. The modern gentleman is masculine and has a stylish look with attention to detail. Nothing is left to coincidences – neither is the shave. This is the story about the meeting between the barbarian and the barber, the barbarian and the gentleman.

Barberians offers a touch of the values of old Copenhagen with an exclusive, authentic grooming experience.
